Detailed Action

Acknowledgement

The Office would like to acknowledge that the Advisory Action mailed 2/21/2008 was in error as it was filed after the 6 month statutory period established in the Final Office Action mailed 5/30/2007. Further, as addressed in this notice of allowance, the claims, timely submitted by the Applicant, on 8/13/2007 place the application in condition for allowance.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the original drawings submitted on July 16, 2001 is not related to this pending application since the inventor is not the same inventor as in the pending application. The submitted drawing of July 16, 2001 is by inventor, Cordray et al, with the title "Delayed Storage of Cookies with Approved Capacity" which does not have the same subject matters of the pending application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-5 and 6-7 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention generally discloses a process for comparing income, principle and expenses of an existing trust and a proposed trust. The prior arts of record include the teaching of Maggioncalda et al. (US 2002/0138386), Frank et al. (US 2002/0013754), and the background of present pending application 09/887,938 by Wilezek. Maggioncalda teaches evaluates the trend and classifies the assets according to the current optimal portfolio allocation based upon the current state of the decision variables. On the other hand, Frank teaches trusts as an investor may consider investments within a trust part of the overall family portfolio. Lastly, Wilezek teaches a Total Return Unitrust. However, the prior arts of record fail to teach, singly or in combination, a process for assisting trust beneficiaries and trustees in deciding whether to convert an irrevocable trust to a proposed total return unitrust comparing income, principle and expenses of an existing trust and a proposed trust, each trust having assets, the process comprising evaluating and classifying each asset in the existing *irrevocable* trust, determining the allocation of assets, and applying the payout % to the prior year-end balance to determine what the current year payout should be.

Upon a further examination, Examiner made an error in sending out the advisory action of February 12, 2008. The examiner agrees with the applicants' arguments presented in the amendment of August 13, 2007 and has withdrawn the advisory action of February 12, 2008 and the rejection under 35 U.S.C. 103(a) as being unpatentable by Maggioncalda et al. (US 2002/0138386), Frank et al. (US 2002/0013754), and the background of present pending application 09/887,938 by Wilezek. The prior arts of

records taken singly or in combination fail to teach or fairly suggest the claimed invention. Therefore, the examiner favors the allowance of claims 1-5 and 6-7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
